Professional Summary

Entry-level Data Analyst with strong skills in Python, SQL, Power BI, and Tableau. Proficient in data cleaning, visualization, reporting, and predictive analytics through academic projects and internships. Passionate about turning data into actionable insights and solving business problems.

Key Strengths: Data Cleaning and Preprocessing — Statistical Analysis — Business Intelligence — Machine Learning Fundamentals SQL Query Optimization — Predictive Modeling — Dashboard Development — Data Visualization

Education

B.Tech in AI & Data Science, CARE College of Engineering (2021 – 2025)
CGPA: 6.9/10

HSC, Government Higher Secondary School, Mannachanallur (2019 – 2021)
Percentage: 77%

SSLC, Government Higher Secondary School, Mannachanallur (2018 – 2019)
Percentage: 66%

Technical Skills

Programming Languages: Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL (MySQL, PostgreSQL)

Data Visualization Tools: Power BI, Tableau, Matplotlib, Seaborn

Machine Learning: Supervised Learning, Unsupervised Learning, Natural Language Processing, Clustering

Business Intelligence: Data Cleaning, Reporting, Forecasting, A/B Testing

Professional Experience

Data Analysis Intern, Sam Core Solutions (Remote) 3 Months

- Extracted, cleaned, and analyzed large datasets to generate actionable business insights.
- Developed interactive dashboards in Power BI to track key performance indicators.

Data Science Intern, Let's Upgrade (Remote) 2 Months

- Conducted exploratory data analysis (EDA) on real-world datasets.
- Built predictive models using Python, Pandas, and Scikit-learn.
- Generated reports and dashboards using SQL and Power BI for business reporting.

Workshop Participant, Code Tantra (On-site) 15 Days

- Completed hands-on training in Python programming, Data Science, and Machine Learning basics.

Projects

Crime Data Analysis and Prediction

- Analyzed historical crime data to identify patterns, trends, and hotspots.
- Built predictive models using Random Forest Regression to forecast crime rates.
- Developed a web application using Flask to visualize predictions and analysis results.

Retail Sales Analysis — SQL Project

- Focused on retail sales analysis using SQL for data-driven insights.
- Performed data cleaning, exploration, and organization to ensure high-quality datasets.
- Analyzed sales trends and answered critical business questions with optimized SQL queries.
- Delivered clear and professional reporting to stakeholders.

Sales Dashboard Using Excel

- Completed a project on bike sales across three regions involving data cleaning, transformation, and analysis.
- Created pivot tables, performed data visualization, and developed a dashboard using Excel.

Certifications

Python for Data Analysis — SQL for Data Science — Power BI — Excel for Data Analysis — Data Analytics Certificate — Machine Learning Basics
